

A modern interior space featuring a large, curved, white structure that resembles a giant hand or a futuristic architectural element. The structure is illuminated from within, creating a warm, glowing effect. The ceiling is also illuminated with recessed lighting, creating a series of parallel lines that recede into the distance. The overall atmosphere is clean, minimalist, and futuristic.

 Alubond | Solid Surface  
U.S.A.

Countless Possibilities

Alubond Solid Surface's high-tech surface has endless possibilities. Created to offer a higher performance alternative to conventional surfacing materials, it is now internationally recognized for its value to the world of design and architectures. Alubond Solid surface is renowned for exceptional versatility, beauty and almost limitless applications for residential, public and commercial environments, both indoor and outdoor. From kitchens to lighting, home automation systems to touch control surfaces, bathrooms to the skin of buildings and furnishing and fashion accessories: the "alchemy" of Alubond Solid Surface can be found in an extensive and expanding range of everyday product, systems and designs.
